MOBILE AND ACTIVE WITH ABEBA

Our feet do the heavy lifting – every day

Healthy feet keep us mobile and in good spirits. Unfortunately this important part of the body often doesn't receive the attention it is due. Our feet play a vital role in our lives and are literally the foundation on which we stand. If the foundation starts to crumble it can affect the whole body: knee and hip problems, back- or even headaches can be the symptoms of badly manufactured shoes and the malposition that follows with them.

Especially in a working environment additional pressure is put on our feet. To support healthy feet and ensure mobility it is essential to create shoes that minimise work specific risks and at the same time reach our high standards of wearing comfort. If the mobility is reduced by injured feet, this in turn leads to a prolonged sick leave which affects both employee and employer.

What can ABEBA do to protect your feet in a working environment and to support their well-being?

One thing is clear: Shoes have to fit!

Anatomically optimised lasts in combination with different forms offer us the possibility to create shoes with high wearing comfort for virtually every foot shape.

A high slip-resistance is a must!

Special outsole design make for sure standing and this way minimise the risk of falling down through stumbling or slipping.

What's on the inside counts, too!

Replaceable insoles and breathable, antibacterial linings provide a good foot climate. On top of that, ABEBA insoles optimise the cushioning effect over the whole surface and if needed we can offer you some orthopaedic insoles (that will be made especially for your feet of course).

Specialties make all the difference!

As a special shoe designer ABEBA offers a multitude of unique accoutrements which are especially made for the different needs and requirements of the varying professions. We are for instance able to offer a great range of shoes that are HACCP compliant and therefore adhere to the strict requirements of the food industry.

"Enjoy walking" is our motto and incentive at the same time!

! INFORMATION

 is an innovative high-tech material which is especially water-resistant and breathable. It even surpasses hydrophobic leather. It is washable up to 30°C without shrinking and anti-bacterial, which is making it perfect for the use in hygienic sensitive areas. Additionally it can be equipped with various treatments such as silver ions. Due to its special structure it is light and smooth but at the same time very tearproof and resistant.  replicates leather visually without turning yellow due to direct sunlight.
